Public access Private endpoint connections Workspace managed outbound access

Saving... Discard changes Refresh

Public network access allows access to this resource through the internet using a public IP address. An application or resource that is granted access with the following network rules still requires proper authorization to access this resource. [Learn more](#)

Public network access ☒ Disabled ☐ All networks

No public network can access this resource.

Create a private endpoint

✓ Basics ✓ Resource **3 Virtual Network** ④ DNS ⑤ Tags ⑥ Review + create

Networking

To deploy the private endpoint, select a virtual network subnet. [Learn more](#)

Virtual network ①

Subnet * ②

Network policy for private endpoints Disabled ([edit](#))

Private IP configuration

- ☒ Dynamically allocate IP address
☐ Statically allocate IP address

Application security group

Configure network security as a natural extension of an application's structure. ASG allows you to group virtual machines and define network security policies based on those groups. You can specify an application security group as the source or destination in an NSG security rule [Learn more](#)

Create a private endpoint ...

✓ Basics ✓ Resource ✓ Virtual Network **4 DNS** 5 Tags 6 Review + create

Private DNS integration

To connect privately with your private endpoint, you need a DNS record. We recommend that you integrate your private endpoint with a private DNS zone. You can also utilize your own DNS servers or create DNS records using the host files on your virtual machines. [Learn more](#)

Integrate with private DNS zone ☒ Yes ☐ No

Configuration name	Subscription	Resource group	Private DNS zone

Azure Bastion protects your virtual machines by secure and seamless RDP & SSH connectivity without the need to expose them through public IP addresses. Deploying will automatically create a Bastion host on a subnet in your virtual network. [Learn more](#)

Create Bastion

Name ① vm-ai-vnet-bastion

Resource group ① vm-ai

Virtual network ① vm-ai-vnet

Public IP address ① vm-ai-vnet-ip

SKU ① Standard

Bastion pricing starts with an hourly base rate. [Learn more](#)

Creating a new Bastion 'vm-ai-vnet-bastion'.

Deploy Bastion

Configure manually

Access Bastion
